On complaint, it is the order of the board that the clerk write Mr. Lepold Moeller and request him to remove any obstructions he may have on the road between sections 8 and 18, township 28, range 40.

The official bond of James Kennedy for road overseer of Dist. 6, was examined and approved.

There being no further business it is the order of the board that recess be taken subject to a call by the clerk.

W. C. MOUNTS, Clerk.

**AIRSHIP FALLS INTO CHANNEL**

Herbert Latham Falls to Sail From France to England. Calais, France, July 20.—Herbert Latham, the French aviator, after waiting for more than a week for a favorable opportunity to attempt a flight at crossing the channel from Calais to Dover, made a start, but after covering about sixteen miles, and while at a great height, the motor failed and the machine fell into the water. The French torpedo boat destroyer Harpon, however, was close at hand and rescued both Latham and his monoplane.

**Arraigned on Murder Charge.**

Port Huron, Mich., July 20.—Samuel Frisbie of Cleveland was arraigned here and declined to plead to a charge of murder as a result of the killing of Louis Rosenberg of Cleveland at the St. Clair flats last Wednesday night. Justice Benedict thereupon entered a plea of not guilty and denied Frisbie bail. Rosenberg was murdered near the Joe Bedere resort and Frisbie declares Frank Elbera of Cleveland, who committed suicide when arrested, did the killing. Frisbie, however, admitted being present.

**Lions Chase Roosevelt Aide.**

Naivasha, British East Africa, July 20.—Leslie A. Tarlton of Nairobi, who accompanied the Roosevelt expedition to the Sotik country, arrived here. He was chased into the town by five lions, the district having been invaded by many of these animals.

**RAILWAY NOTES AND PERSONALS.**

G. W. Betebenner and family are enjoying an outing at Hot Springs. Clare Mewhirter, the night agent at Hemingford, was in Alliance Saturday. W. E. Herculall is acting as agent at Seneca while the regular man, Spradling, is taking a vacation.

General Manager Holdrege passed through Alliance on No. 43 Wednesday enroute to Sheridan.

Carl Spacht, who has been working in the storehouse as stenographer, has been appointed night clerk in the chief dispatcher's office.

M. O. Joder departed on No. 41 Sunday morning for Seattle. He will later join his family in California for a visit before returning.

T. R. Randall, who has been laying off visiting his parents in the eastern part of the state, has returned and resumed work on the road.

Engineer J. A. McDonald of Ravenna came up from Seneca on No. 45 Sunday morning, returning to his regular run out of Seneca the same evening.

A. Gavin is working in a new time card to take effect about August 1, a few minor changes being made. R. C. McLeese is acting as chief dispatcher in his absence.

The C. & N. W. ranks third in the U. S. and Canada for the number of miles of road under the automatic block system, the Southern Pacific being first and the Union Pacific second.

C. E. Wills and family returned Sunday morning on No. 42 from a visit in the north coast country, taking in the exposition and visiting Mrs. Wills' mother, Mrs. McIntyre, in Spokane.

Conductor Nels Pederson and Engineer Hicks of Ravenna were in Alliance Wednesday, they bringing second section of No. 41 from Seneca, owing to a shortage of west end crews there.

The Pullman company carried 6,000,000 passengers in their cars in 1899 who paid \$10,000,000 for their rides. In 1908, the hard time year, they carried 18,000,000 passengers and received \$30,000,000.

Firemen T. F. King of Sterling was seriously injured last Tuesday night at Bridgeport by falling off the coal shed. He was brought to Alliance on No. 302 and taken to the hospital. Mrs. King arrived on No. 304 Wednesday to be at his side.

Omaha and Chicago papers report that W. J. Hoback, who for several years was agent for the Burlington at Hazard, Nebr., and who left the service about a year ago, committed suicide in Indiana a few days ago. No cause seems to have been known for the act.

Engines 2862 and 2863, new passenger engines for the Sheridan division, passed through Alliance last week. The Burlington is getting pretty well equipped with motive power, both for freight and passenger service, preparatory to the big rush of business expected this fall.

The Payne Investment company of Omaha brought a delegation of land seekers in on No. 41 Wednesday morning and a special was run from here to Scottsbluff for them. This company has conducted several of these excursions to that vicinity this summer, coming from Omaha in a special sleeping car. This time, however, they came through in a chair car instead.

A terrific thunder, rain, hail and wind storm occurred in the vicinity of Ellsworth and Bingham last Thursday which did no damage to the railroad except blow down telegraph poles and thus interfere with telegraphic communication east. Mr. Joder with a lineman and an operator went east on a special to repair the wires and they were working before day light the next morning. In the meantime, the dispatchers in Lincoln looked after the trains as far west as Seneca.

President Tuttle of the Boston and Maine road said in a recent speech: "The conductor is the truest representative of the railroad. He has more to do with making the system popular with the public than has the president and all the directors of the road put together. Much depends upon his tact, judgment, courteousness and personality. His smile and courteous reply go a great way with patrons. He is the diplomat of the road and comes closer to the riding public than any one else connected with the system."

The pay car was in town last Friday, coming in on No. 302 at 3 a.m. and going east at daylight to pay off the extra gangs between Alliance and Whitman. A large delegation of railroad men, who were "broke," greeted them on their return about noon. The practice in the past has been to pay

**QUIZZLE**

**JULY THE LAST**

\$5.00 in gold for the first correct solution of the above puzzle received by July 28th, 1909. Address

Alliance Quizzler Box 781

the men here in the morning, and go west about noon, and mail the checks to the men stationed between Alliance and Ravenna, but owing to the many laborers, principally foreigners, working east of Alliance, the pay car has gone down to pay them off the past three or four pay days to avoid any trouble arising from the confusion in their names.

E. T. Bracken, general superintendent of Alliance, and J. B. Birdsell, division superintendent, also of Alliance, spent a half hour in Broken Bow Tuesday, inspecting railroad improvement work, which is going on here. Mr. Bracken recently assumed the duties of general superintendent and this is his first tour of inspection over the division.—Broken Bow Chief.

Spot, the railroad dog that belongs in Louie Maxwell's crew on the local

freight, met with an accident in Bushnell Friday morning that removed a piece of a part of his anatomy and disfigured him for life. The dog sat down in the middle of the Q track watching the Monmouth passenger come in and failed to move quick enough. The pilot hit him and rolling him over and over finally threw him clear of the rails, excepting about four inches of his tail which lay on the rail and the front trucks passed over it. Louie gathered up his pet and turned him over to a surgeon with orders to amputate the tail properly and give him the best of care, but poor Spot will make a bum brakeman now for by the loss of his tail he will have nothing to pass signals with.—Cuba, Ill., Journal.

Buy a Boyer gliding settee for your porch or lawn at The Gadsby Store. 26-1f

**Railroad Notes from Edgemont**  
(From last Friday's Express)

Chief Boiler Maker McNamara of Alliance, was in town all last week taking a vacation, and will go to the Northern Hills. Though he has been in Edgemont and Alliance for two years he has not yet visited the Black Hills country and was anticipating great pleasure in the trip.

Trains are now running into Spearfish, the company having done the largest amount of work possible toward this end.

The turn table at the round house is being fixed up to meet the requirements caused by the heavy engines. New channel bars three-fourth in place of five-eighth ones have been put in and the track has been repaired and the whole turn table made more serviceable.
